

CAMPER / MARINE

INDUCTION AND DIESEL COOKING

3800 DUAL POWER

3,8 kW | Induction + Diesel Cooktop

Induction power:	1800 W (230 V / 110 V)
Diesel power:	1000-2000 W (12 V DC)
Fuel consumption:	max 0,2 l/h max 6.8 oz/hr
Electricity consumption:	0,37-0,55 A (diesel mode)
Dimensions:	L 465 mm / 18 5/16" W 315 mm / 12 3/8" H 126 mm / 4 15/16"

INDUCTION
&
DIESEL

Two power sources, one cooktop

A single ceramic surface switches between **electric induction** and **diesel** power.

3800 Dual Power is a **gas-free cooking solution**. No LPG bottles, no gas lines and no open flame.

Ceramic cooktop is **easy to keep clean**.

Cook **fast with induction** on battery or shore power, and **keep cooking on diesel** when electrical capacity runs low.

Inverter friendly: continuous low-power output without on-off cycling and **adjustable power limitation** for small fuses and inverters.

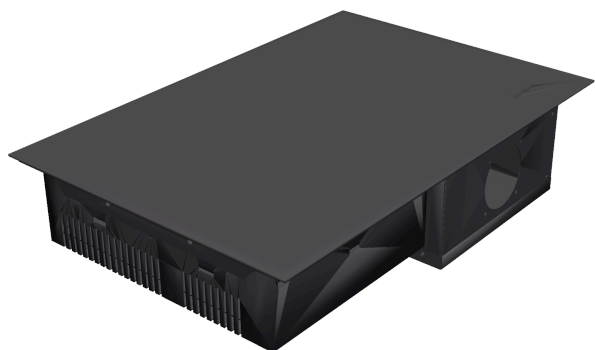

Full-size cooking for boats and campervans in a **compact package**.

Shallow installation depth makes it easy to fit in tight galleys and kitchens.

Built-in **high-altitude switch** for diesel operation in the mountains.

Cook on induction when power is plentiful. When the batteries run low, switch to diesel and keep cooking on the very same surface.

2-IN-1 INDUCTION + DIESEL

100% GAS FREE SOLUTION

INVERTER FRIENDLY

INSTALLATION

Flush mounted ceramic top with a **shallow installation depth**.

INSTALLATION

- Flush mounting into worktop
- Top: 465 × 315 mm
- Installation height 126 mm
- Induction: 230 V / 110 V supply
- Diesel: 12 V, fuel and exhaust connections
- Installation kit 3735 available

FEATURES

- Induction and diesel on one ceramic cooktop.
- Fast induction on battery or shore power.
- Diesel operation when electrical power is limited.
- Adjustable induction power limitation for small fuses and inverters.
- Continuous low-power output without on-off cycling.
- No LPG bottles or open flame.
- Built-in high-altitude switch.
- Warranty 2+1 years.

DUAL POWER

INDUCTION | Diesel

Induction 1800 W

Quick, precise cooking on 230 V / 110 V from shore power, battery and inverter.

Diesel 1000-2000 W

Runs on 12 V with very low power draw. Cook off-grid without draining the batteries.
