MATRIX MASTER

3,6 & 1,8kW | Heat exchanger

	7400	7300
Heat output:	3600 W 12,280 BTU	1800 W 6,140 BTU
Air flow min/max:	22/353 m^3/h	14/222 m^3/h
Current min/max:	0,1/5,5 A	0,04/2,3 A
Power consumption min/max:	1,2/66 W	0,5/27,5 W
Dimensions:	L 420 mm W 330 mm H 138 mm	L 420 mm W 215 mm H 138 mm
Weight:	*5,2 kg / 11,4 lbs.*	*3,2 kg / 7,0 lbs.*

Wallas Matrix heat exchangers are designed to complement the Wallas water heating system. The heat exchanger **enables air heating** using the hot coolant cycling in the system.

The **steplessly** and **thermostatically controlled** matrix heat exchangers blow exactly the amount of warm air needed keeping the temperature nearly constant.

There are two new Matrix Masters available in the market with different powers; 1,8 kW and 3,6 kW. Both have **wide heating range.**

The Matrix Master **can be fitted in almost every vehicle or boat** due to automatic 1-100 power control. Matrix heat exchangers can run **extended time periods** with very low power consumption.

Wallas Matrix heat exchangers are **the most silent** in the market.

The Matrix Master heat exchanger can be installed **at any distance** from the diesel heater unit of choice.

Many different model variants to choose from.

TRUE STEPLESS CONTROL

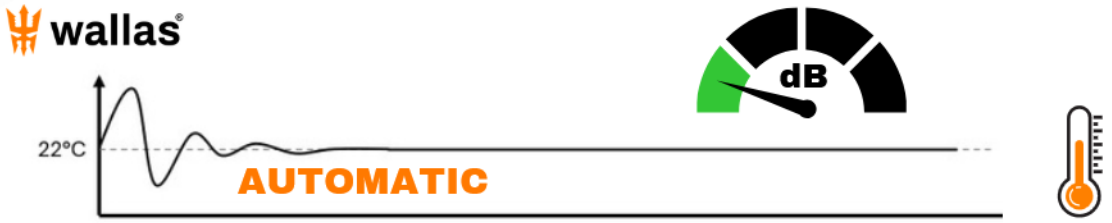

THE MOST SILENT HEAT EXCHANGER

PREMIUM COMFORT

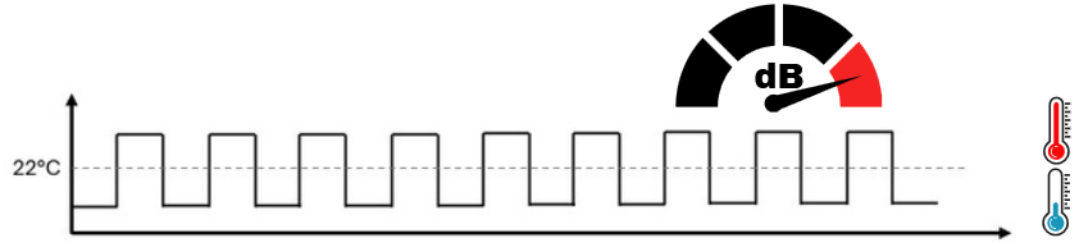

VERSATILE INSTALLATION

COMPARISON

Wallas Matrix Heaters will keep the temperature near the target temperature automatically. Constant and low RPM's will reduce noise and electricity consumption.

Typical matrix heaters are either on or off. So the room temperature is not stable and they stop and start constantly which will increase noise, electricity consumption and lead to the situation where the room is either too cold or too warm.

INSTALLATION KITS

Recommended builds	Diameter	MatrixMaster	Accessory kit
CAMPER VANS	ø 60 mm	7305 / 7405	3760
BOATS	ø 75 mm	7300 / 7400	3775
